

Sage 50 Job Costing

Sage 50 Job Costing is ideal for businesses of all sizes in all sectors. It helps analyse and control the costs of jobs and services by enabling you to understand the precise cost breakdown of any job.

Sage 50 Job Costing will help you to:

- Track the status of jobs easily, including milestones, cost summaries and revenue and budgets
- With up to 10 analysis codes you can accurately track and analyse your costs
- Split costs by their constitution component e.g. labour, materials, etc. - enabling you to analyse and run reports on each category
- Use a range of management reports, including profitability reports that show costs, revenue and profit made against each job. This ensures you know exactly how much profit has been made on each job
- Automatically calculate invoices according to your choice of billing methods e.g. cost plus, fixed price or combination of charges based upon time, material and other costs
- Post and print invoices against jobs whenever you like, helping you to get paid on time and improving your cash flow
- Track how much of each employee's time has been used and on which jobs
- Integrates directly with Sage 50 Accounts, meaning that costs, timesheets and billing information need only be entered once, removing duplication and saving time

Sage 50 Job Costing Professional

Sage 50 Job Costing Professional offers additional features, such as purchase order processing and batch timesheet entry, that are ideal for larger companies with more complex requirements.
